Introduction

Functional, high-quality and hygienically designed

Elpress is the leading manufacturer in the field of industrial hygiene. We focus on delivering total solutions: customer-focused systems, professionally integrated into your business process. By simplifying processes and sharing knowledge, we can add value to your business with a complete range of products.

Personal hygiene

Efficient personal hygiene cannot be underestimated, especially in an environment where the risk of contamination poses great danger. Whether it's a washbasin, boot cleaner or a built-in hygienic entrance, our product range enables us to offer you a solution for every challenge. Systems produced in-house with an Elpress feel; functional, high quality and hygienically designed.

Service

Service is our keyword. After you invest in our products, we continue to work with you. For maintenance and/or repairs, our daily operating mobile service vans carry the right equipment and knowledge on board. This enables us to provide you with optimal disposal in the short and long term. A complete package of solutions, therefore, always with a strong focus on you as our customer. Elpress is an ambitious organisation, and we can justifiably say we have a passion for hygiene!

Hand cleaning and disinfection

Wash basins

Our sensor operated wash basins are equipped with a legionella prevention system by means of automatic flushing on set times. This flushing can start between 24 and 78 hours after the last use (adjustable).

EWG-1

The single wash basin is a revelation for personal hygiene. The wash basin is ergonomically designed and reduces the risk of infection through the use of sensors. The wash basin and the tap are made from stainless steel. To prevent unpleasant smells, a siphon is mounted in the drain.

Benefits

- Made from stainless steel
- Legionella prevention
- Mixer tap
- Water does not reside in corners

Wash basins with hand dryer

The EWG-TAP has been ergonomically designed. Touch free operation ensures a maximum level of hygiene. After washing your hands, the integrated Dyson Airblade Tap hand dryer produces a powerful air flow for drying.

Wash basins with hand dryer

The EWG-TAP has been ergonomically designed. Touch free operation ensures a maximum level of hygiene. After washing your hands, the integrated Dyson Airblade Tap hand dryer produces a powerful air flow for drying. A mixing valve enables you to configure the desired water temperature. The entire installation is made from hygienically finished stainless steel. Standard delivery includes the pedestal with inspection shutter.

Automatic legionella prevention

Our sensor operated wash basins are equipped with a legionella prevention system by means of automatic flushing on set times. This flushing can start between 24 and 78 hours after the last use (adjustable).

Benefits

- Saves water due to sensor operation
- No water on the floors
- Including siphon
- 12 second dry time

Chemical dispensers

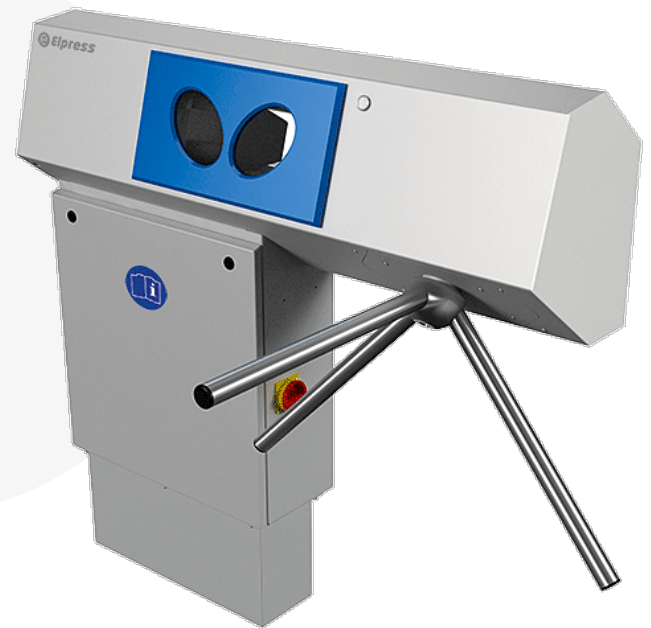

The HDT / HST is an automatic dispenser / dosing unit and reduces risks when entering production areas. When the hands are inserted into the cylinders, sensors activate the atomisation of the disinfectant or soap. After this, the turnstile is released and one can proceed. The HDT / HST is meant to be placed on a flat surface.

HDT / HST

The HDT / HST is an automatic dispenser / dosing unit and reduces risks when entering production areas. When the hands are inserted into the cylinders, sensors activate the atomisation of the disinfectant or soap. After this, the turnstile is released and one can proceed. The HDT / HST is meant to be placed on a flat surface.

Benefits

- Ergonomic design
- 5 litres of chemicals integrated
- Adjustable two-sided chemical dosing
- Chemical level indicator
- Reduces contamination risks

HDT-WM / HST-WM

The HDT-WM / HST-WM is an automatic dispenser / dosing unit and reduces risks when entering production areas. When the hands are inserted into the cylinders, sensors activate the atomisation of the disinfectant or soap. After this, the turnstile is released and one can proceed. The HDT-WM / HST-WM is to be mounted to the wall and is suitable for disinfectant and soap.

Benefits

- Reduces contamination risks
- Wall- or floor mounting
- Adjustable two-sided chemical dosing
- Chemical level indicator
- Thrifty with chemicals

Professional soap dispenser

Looking for a professional soap dispenser with manual or automatic operation? Elpress gives you the choice of various stainless steel soap dispensers. If you work in the food industry and have lots of points of contact between employees and the food or machines, then you should choose our soap dispenser as a hygienic solution for washing your hands.

Specialist in hygiene technology

Elpress has been active in the market for over 40 years and specialises in hygiene technology for the food industry. At Elpress, we know how important hygiene is to you as a producer in the food industry. That's why our smart hygiene technology connects seamlessly with this. So you can choose an innovative product that can be expertly integrated into your business process. The advantages of Elpress:

Benefits

- Extensive knowledge and expertise as a manufacturer
- Over 40 years of experience
- Passion for hygiene
- Innovative systems

Stainless steel soap dispensers for better hygiene

Elpress soap dispensers are made from stainless steel. Stainless steel soap dispensers have low surface roughness, which ensures less contamination and makes them easier to clean. You can also choose an advantageous plastic version.

Soap dispensers and total solutions

Elpress is the right place to come not only for a professional soap dispenser. At Elpress, we like to go one step further. We offer a total solution that assures you of high-quality products, such as a hygiene lock, as well as a fully defined process for daily cleaning and disinfection tasks. We'd like to talk to you about simplifying and optimising your daily cleaning process. If you'd like more information about the possibilities then please don't hesitate to contact us.

Hand dryers

The fastest, most hygienic hand dryer is the Dyson Airblade™. The hand dryer filters the air before it reaches the hands. In just 10 seconds the water is removed from your hands by a 'blade of air'. Furthermore, the Airblade™ hand dryer is cheaper than conventional hand dryers. The Dyson Airblade™ uses up to 80% less energy. The HEPA H12-filter enables the Airbladetm to remove up to 99,9% of the bacteria present.

Benefits

- Low energy consumption
- Fast and effective
- Dry hands
- Up to 80% more economical than conventional hand dryers

Cleaning and/or disinfecting
boots/shoes

Sole cleaners

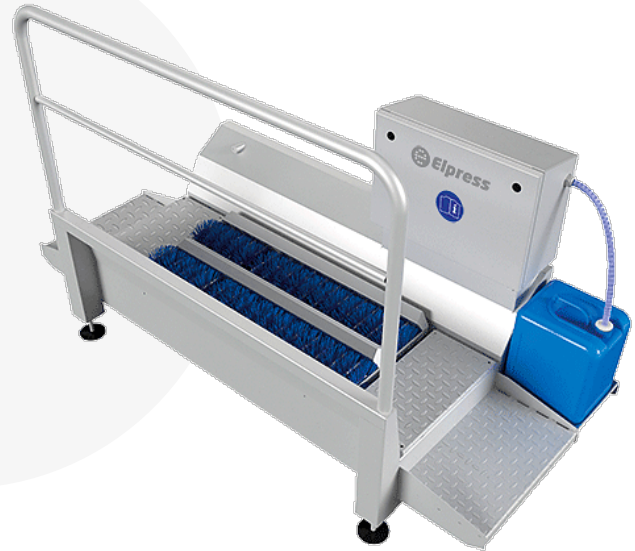

Due to the low step of just 175 mm, the DZW is ergonomic to use. The brushes are automatically humidified and activated by means of sensors. This ensures that energy consumption remains low. The DZW uses the right amount of chemicals, thanks to the sensors. The splash protection prevents the space around the DZW becoming a mess.

DZW

Due to the low step of just 175 mm, the DZW is ergonomic to use. The brushes are automatically humidified and activated by means of sensors. This ensures that energy consumption remains low. The DZW uses the right amount of chemicals, thanks to the sensors. The splash protection prevents the space around the DZW becoming a mess.

Benefits

- Reduced risk of infection
- Thrifty with chemicals
- Sensor-controlled dosing
- Chemical level indicator

EZW

By placing the sole of the shoe on the brush, while holding the handle at the same time, your shoes are cleaned quickly and efficiently. The EZW works via a sensor on the grip. The unit is compact and therefore fits easily in smaller spaces.

Benefits

- 4-year warranty on brushes
- Free choice of chemicals
- Fast and effective cleaning
- Thorough cleaning

Sole disinfection

The DZD disinfects soles by means of a disinfection bath. The bath is automatically topped-up with disinfectant. This means the systems never fails, and the excessive use of disinfectant is prevented.

DZD

The DZD disinfects soles by means of a disinfection bath. The bath is automatically topped-up with disinfectant. This means the systems never fails, and the excessive use of disinfectant is prevented. Regardless of which disinfectant you use, the splash protection makes sure the space around the DZD remains clean. After twenty-five passings the disinfection bath is automatically topped-up.

Benefits

- Automatic refreshing of disinfection bath
- Drip-off zone
- Reduced risk of infection
- Disinfectant level indicator

Sole and shoe side cleaner

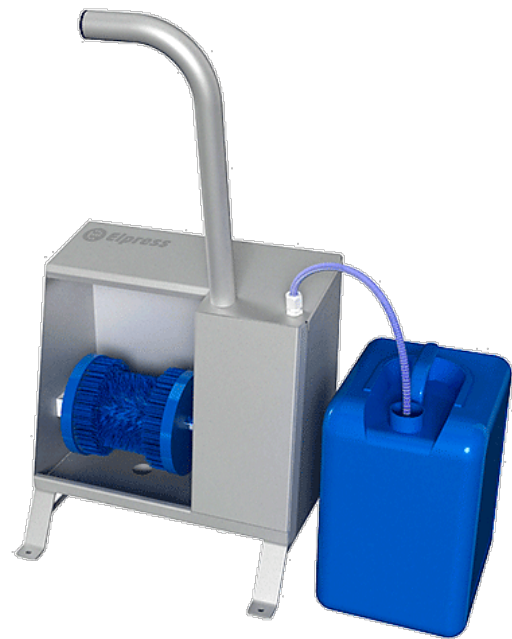

Cleaning soles and the edges of shoes is an important aspect of the hygiene protocol in factories. By cleaning the soles and edges of shoes well, you can ensure that the production room remains hygienic. As well as hygiene entrances, Elpress has a number of compact sole and shoe edge cleaners that easily fit into smaller rooms. Elpress sole and shoe edge cleaners ensure rapid and thorough cleaning that takes less time.

EZR

When you place the sole of the shoe on the brush and hold the handle at the same time, your shoes are cleaned quickly and efficiently. The brushes activate via a button on the grip. Because the EZR also cleans the sides of your shoes, you can also be sure of maximum hygiene. The EZR is compact and fits in smaller spaces.

Benefits

- Adjustable dosing for sole cleaning
- 4-year warranty on brushes
- Sole and shoe side cleaning
- Reduced risk of infection
- Thorough cleaning

EZR DELUXE

The EZR Deluxe is the robust version of our sole and shoe edge cleaners. There are a number of additional advantages from this model. Chemistry is integrated into the model so it is not standing on the floor. Furthermore, the EZR Deluxe is provided with a wider brush, raising the cleaning process to an even higher level. Using the adjustable feet, you can adjust the model perfectly. As well as these additional advantages, the EZR Deluxe also provides the standard advantages of the Elpress sole and shoe edge cleaner.

Benefits

- Adjustable dosing for sole cleaning
- 4-year warranty on brushes
- Sole and shoe side cleaning
- Reduced risk of infection
- Thorough cleaning

EDZW

When entering the unit, sensors activate the automatic rotation of the brushes and your soles and shoe sides are cleaned. The “walk-through” principle ensures time efficient cleaning, while your hygiene remains ideally ensured in the following area thanks to a combination of sole and shoe side cleaning. The installations have a low step height and are easy to use.

Benefits

- Adjustable dosing of chemicals
- 4-year warranty on brushes
- Automatic operation
- Hygienical construction and surface finishing

Sole and shaft cleaners

Het automatisch bevochtigen en activeren van de roterende borstels zorgt ervoor dat de unit niet overbodig veel energie verbruikt. Ook gebruiken de zolenreinigers dankzij de sensor steeds de juiste hoeveelheid chemie.

EZSW

By holding the grip with the sensor and placing the boot on the brushes, the sole and shafts are being cleaned. The EZSW ensures a maximum level of hygiene. This sole- and shaft cleaner is effective and easy-to-use.

Benefits

- 4-year warranty on brushes
- Reduced risk of infection
- Quality assured
- Hygienic process

EDLW

When entering the unit, sensors activate the automatic rotation of the brushes. Soles and shafts are cleaned. The EDLW ensures a maximum level of hygiene. The EDLW has a low step and is user-friendly.

Benefits

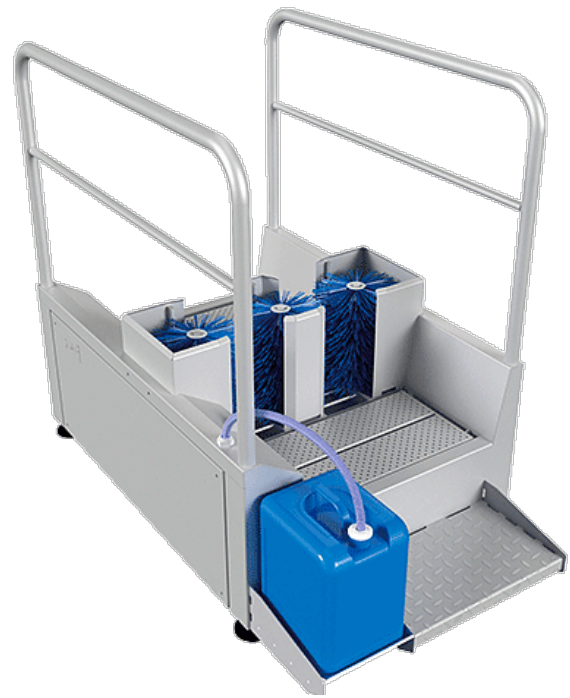

- 4-year warranty on brushes
- Reduced risk of infection
- Quality assured
- Hygienic process

EDSW

When entering the unit, sensors activate the automatic rotation of the brushes. Shafts are cleaned. The EDSW ensures a maximum level of hygiene if you only wish to clean shafts. The EDSW has a low step and is user-friendly.

Benefits

- 4-year warranty on brushes
- Reduced risk of infection
- Quality assured
- Hygienic process

ELZW

By placing the sole of the shoe on the brush, while holding the handle at the same time, your shoes are cleaned quickly and efficiently. The ELZW works via a sensor on the grip. The unit is compact and therefore fits easily in smaller spaces. By means of the hand brush the shafts can be cleaned as well.

Benefits

- 4-year warranty on brushes
- Free choice of chemicals
- Fast and effective cleaning
- Thorough cleaning

DZSW

Total solutions

Sole cleaning and hand disinfection

The DZW-HDT does two things at the same time: it cleans the soles and disinfects the hands. The rotating brushes are automatically humidified.

DZW-HDT

The DZW-HDT does two things at the same time: it cleans the soles and disinfects the hands. The rotating brushes are automatically humidified. The hand disinfection is regulated by sensors. Spray nozzles above and underneath the hand ensure a good atomization of the disinfectant. After the hands have been disinfected, the turnstile will be released and one can proceed to the next room.

Benefits

- Easy-to-clean
- Ergonomic design
- 4-year warranty on brushes
- Adjustable two-sided chemical dosing

Hygiene stations

The hygiene stations are ideal units for a hygienic work process. Thanks to the sensors, there is no superfluous use of chemicals and/or time.

EWG-EZR

By placing the sole of the shoe on the brush, while holding the handle at the same time, your shoes are cleaned quickly and efficiently. The sole and shoe side cleaner works via a sensor on the grip. The integrated basin is equipped with a legionella prevention system. The hygienic station is made from stainless steel. The unit is compact and therefore fits easily in smaller spaces.

Benefits

- Automatic operation
- Enough space to clean both hands and under arms.
- Legionella prevention system
- 4-year warranty on brushes
- Adjustable dosing of chemicals
- Hygienical construction and surface finishing

SANICARE-WM

The SANICARE-WM is an ideal unit for a hygienic work process. Thanks to the sensors, there is no superfluous use of chemicals and/or time. After dispensing soap and washing your hands you will disinfect your hands in the disinfection cylinders. The turnstile is released only after the hand disinfection is completed.

Benefits

- Chemical dosing on both sides of hands
- Release time of turnstile adjustable
- Hygienical construction and surface finishing
- Sensor controlled operation

Sanicare

The SANICARE is an ideal unit for a hygienic work process. Thanks to the sensors, there is no superfluous use of chemicals and/or time. After dispensing soaps and washing your hands you will disinfect your hands in the disinfection cylinders. The turnstile is released only after the hand disinfection is completed.

Benefits

- Chemical dosing on both sides of hands
- Release time of turnstile adjustable
- Hygienical construction and surface finishing
- Sensor controlled operation

Sanicare-dyson

The SANICARE-DYSON is the most complete unit for a hygienic work process. Thanks to the sensors, there is no superfluous use of chemicals and/or time. After dispensing soap and washing your hands, the Dyson Airblade™ ensures that the hands are dry before they are placed in the hand disinfection cylinders. The turnstile is released only after the hand disinfection is completed.

Benefits

- Chemical dosing on both sides of hands
- Release time of turnstile adjustable
- Hygienical construction and surface finishing
- Sensor controlled operation

SANICARE-EZR

Storage and clothing cabinets

The cabinets are made from stainless steel and are ideal for keeping changing rooms and work areas neat and tidy.

Storage and clothing cabinets (FI)

the cabinets are made from stainless steel and are ideal for keeping changing rooms and work areas neat and tidy. The cabinets have adjustable feet and a slanting top. This is easier to clean and prevents objects from being placed on top of the cabinet.

Options and/or accessories

The cabinets are available with a flat top and in widths of 350, 610, 910 or 1200 mm.

Benefits

- Stainless steel
- Adjustable feet
- Executed with padlock
- Ventilation slots

Multi-compartment cabinets (SP)

The cabinets are made from steel and are ideal for changing rooms or work areas. The cabinets have a bar for clothes hangers and a partition for separating the clothes. At the top of the cabinet there is a storage shelf. Ventilation slots make sure clothing stays fresh. There is a preparation for name cards. Standard colour is grey.

Options and/or accessories

The cabinets are optionally available with a slanting top and in 4 colours (RAL): blue, yellow, red and anthracite.

Benefits

- Available in 4 colours
- Fitted with lock
- Solid construction
- Working with colour codes
- Ventilation slots
